

Math Summer Practice for All Students Entering Third
Grade in the Fall of 2009

- Please have your child complete math pages in their second grade consumable books.
- Please spend some time each week reviewing flashcards for subtraction, addition, and multiplication facts to 5.
- Children should be able to add and subtract in their heads facts up to 18. This will enable them to start the year with a head start in math.

Thank you,
Laurel Machovec
